ROTARY BASKET SPRAYING AND HIGH PRESSURE UNIT WASHING MACHINE

KSP aims to maintain its leadership in the sector with its Dual Jet Automatic Repelling Spray and Manual High Pressure Part Washing Machine, whose design and production is completely owned by KSP Machine.

The feature that distinguishes our Dual Jet Series model from other swivel basket models is its double unit and captures high cleaning sensitivity. It includes automatic Repelling Spray washing as well as it can be controlled manually with the help of high-pressure unit and it offers easy access to every point that cannot be reached with its high-pressure pump. Thanks to the features of our model's units, it increases the washing sensitivity by decreasing the washing time. Dual Jet Series is designed to save operating costs and time.

Appropriate washing time, washing temperature and washing chemicals are determined according to the material and pollution of the part to be washed. Parts inside the wash cabinet are; spraying, spray washing, high pressure washing and optional drying processes. Dual Jet Series is designed to save operating costs and time.
