With the help of more than 20 Years of experience on Engineering KSP Machine has designed the best automatic machine for Diesel Particulate Filter Cleaning Machine. DPF1800 is fully designed and programmed by KSP Engineers after a serious Research and Development Process.

DPF1800 is designed to clean both passenger and commercial vehicles DPFs. Separated Washing and Drying Systems grants you to Wash and Dry different DPFs at the same time, by doing so you will save time and money.

DPF1800 grants more than %99 cleaning effort by regulations on the program and it will let you proof this with the help of printed testing report before and after the cleaning process. Testing process is done by back pressure testing method just like in your cars.

All the functions and safety precautions are controlled by PLC Controllers and Safety Relays; with the help of pre-defined washing programs and Touch-Screen any one can become an Expert for DPF cleaning.

DPF1800 is designed according to CE Norms and Safety Regulations; and limited for both safety of the user and the DPFs. Controls and even the lightning of the washing chamber is done by 24 V DC.

Filtering system on the Washing System always grants you to have clean water and let you make more efficient cleaning for the DPFs. These changeable and washable filters protect you from any future loss or additional costs that can appear for both machine and the work you have done.
